Valid data – Delivery of valid data to the Danish Road Directorate

Before data is considered as valid, it shall be at the *'Published'* state in the Danish Road Directorate's ProjectWise.

States in the Danish Road Directorate are steps which various data shall go through to ensure uniform processing of data and to ensure that various standards and documentation are kept.

These states also determine the user list rights for the project.

When new data is created or uploaded in ProjectWise, it will be placed at the state *'Design'*. At that state, it can be processed until it is ready for publication, quality control, approval, comments, etc.

Read more about the ProjectWise workflows and states and about how data is sent through these states by clicking on *'Description of Workflows' and 'Description of states'* in the user manual main menu.
