

Description of Workflows

- [What is a workflow](#)
- [Workflow for documents](#)
- [Workflow for technical models](#)
- [Workflow for drawings](#)

What is a workflow

A workflow is a collection of states that data shall pass through to become published and thus achieve status as valid data.

To send a file from one state to another, right-click on the file in ProjectWise and select '*Change State*'. Then select the state to which the file should be sent.

For more about each state please click '*Description of States*' in [the user manual main menu](#).

DISCLAIMER

The translation into English of Quality Management Systems is to be regarded entirely as a service. In the event of any discrepancy or shortcomings in the translation, the Danish version will prevail. At any time the Danish versions of Quality Management Systems are those in force.

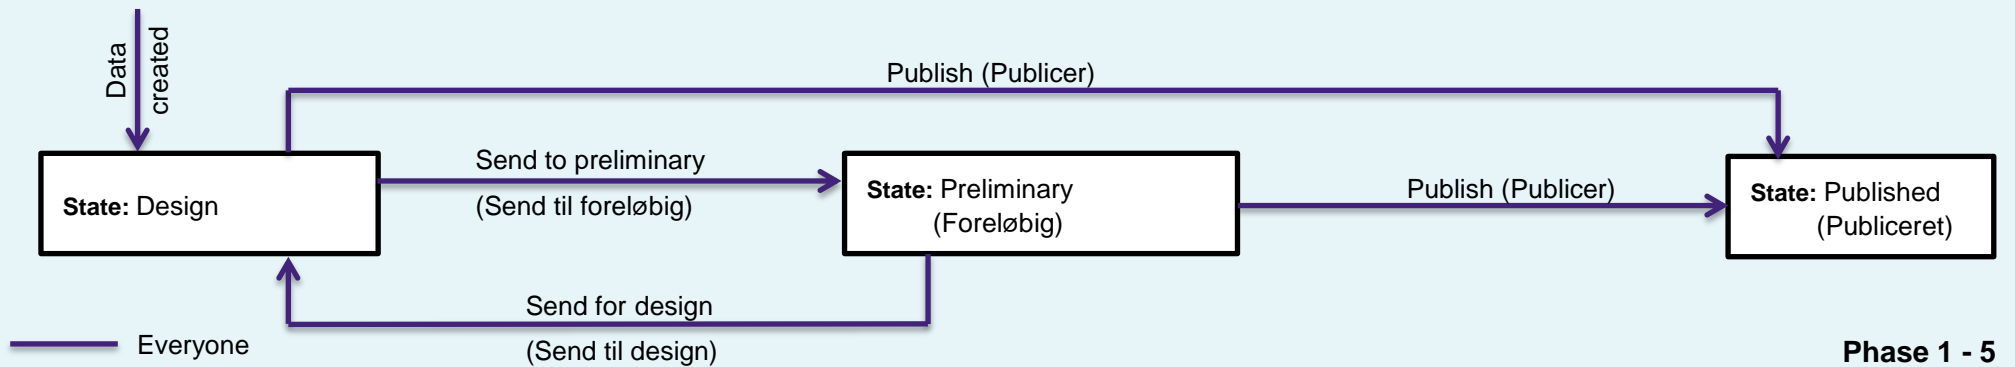

Workflow for documents

All workflows for non-cad documents see below.

Please note that some documents, like request for information, change request, documents for acceptance testing, documents for commenting, review and so on, require that they are sent through a process, other documents do not.

Workflow for non-cad data, which does not require further processing.
