

ProjectWise Explorer – Intro

- [General](#)
- [Project, folder and file properties](#)

General

ProjectWise is a file management system for preparing, sharing and managing files and is used for project cooperation between internals and externals.

Folder structure
Files
Project, folder and file properties

ProjectWise consists of three windows. One window that shows the files and any sub-folders. One window that shows the folder structure and one that shows the project, folder and file properties.

Project, folder and file properties

In ProjectWise, it is possible to see various properties and information for a project, folder or file.

Under Project Properties, you can get information about the project section, stage name, coordinate system, project manager, etc.

Under Folder Properties, you can see who has created the folder and when, the 'Environment' to which the files in the folder are linked, etc.

Under Document Properties, you can see by whom and when a specific file has been created, the file version number, the state of the file, etc.
