

How to deliver 'As-Built' data

Have you created 'As-Built' data, does this first need to be processed by The Danish Road Directorate, who among other things examines whether data complies with The Danish Road Directorate's standards.

- First of all it is important that the attribute 'Step' is filled in with the value 'As-Built', so The Danish Road Directorate knows that it is 'As-Built' data.
- Right click all the files, which has to be delivered 'As-Built'
- In the right click menu go to 'Change State'
- Click 'For processing'

A proceeding for each file has now been created and ProjectWise will log who has submitted the proceeding and when.

If the data fully complies with The Danish Road Directorate's standards, the data will be sent to the state 'As-Built'. And the proceedings will be closed.

If data is not in accordance with applicable standards, The Danish Road Directorate will send the data back to the original sender, who has to correct the data in accordance to the comments communicated by The Danish Road Directorate.
